## RARITNA BAY MEDICAL CENTER Volunteer Services Department

## **Mantoux Tuberculin Skin Test Record Form**

New Jersey State regulations require that <u>all new volunteers have a two-step Mantoux tuberculin skin</u> <u>test (2 injections, 2 weeks apart)</u> before they are assigned to a volunteer position in the medical center.

<sup>\*</sup> It is very unlikely that a side effect to the test will occur. If such an event does happen, the most common reaction is pain or redness at the test site. In very rare cases, a person who is hypersensitive to the solution could have a severe allergic reaction near the injection site. Such rare reactions may include blistering or a skin wound.
