**PRIMARY TREATING PHYSICIAN'S PERMANENT AND STATIONARY REPORT (PR-3)**

This form is designed to be used by the primary treating physician to report the initial evaluation of permanent disability to the claims administrator. It should be completed if the patient has residual effects from the injury or may require future medical care. In such cases, it should be completed once the patient's condition becomes permanent and stationary or has reached maximum medical improvement.

**This form should not be used by a Qualified Medical Evaluator (QME) or Agreed Medical Evaluator (AME) to report a medical-legal evaluation.**

**Subjective Findings:** Provide your professional assessment of the subjective factors of disability, based on your evaluation of the patient's complaints, your examination, and other findings. List specific symptoms (e.g. pain right wrist) and their frequency, severity, and/or precipitating activity using the following definitions:

**Severity:** Minimal pain (Min) - an annoyance, causes no handicap in performance. Slight pain (SlT) - tolerable, causes some handicap in performance of the activity precipitating pain. Moderate pain (Mod) - tolerable, causes marked handicap in the performance of the activity precipitating pain. Severe pain (Sev) - precludes performance of the activity precipitating pain.

**Frequency:** Occasional (Occ) - occurs roughly one fourth of the time. Intermittent (Int) - occurs roughly one half of the time. Frequent (Fre) - occurs roughly three fourths of the time. Constant (Con) - occurs roughly 90 to 100% of time.

**Precipitating activity:** Precipitating activity gives a sense of how often a pain is felt and thus is often provided in lieu of frequency, e.g. slight pain in back on heavy lifting, or slight-to-moderate pain in knee when standing or walking more than six hours per day. Can be used in conjunction with frequency if pain is less than constant while engaging in the precipitating activity. For example, intermittent slight pain on bending would be felt approximately 50% of time while actually engaged in bending.

Symptom	Frequency (Mark X at any spot)	Severity (Mark X at any spot.)	Precipitating Activity

**Pre-Injury Capacity** Are there any activities at home or at work that the patient cannot do as well now as could be done prior to this injury or illness?      Yes      No      Cannot determine

          

If yes, please describe pre-injury capacity and current capacity (e.g. used to regularly lift 30 lb. child, now can only lift 10 lbs.; could sit for 2 hours, now can only sit for 15 mins.)

**Preclusions/Work Restrictions**

Are there any activities the patient cannot do? Yes     No     Cannot determine

If yes, please describe all preclusions or restrictions related to work activities (e.g. no lifting more than 10 lbs. above shoulders; must use splint; keyboard only 45 mins. per hour; must have sit/stand workstation; no repeated bending). Include restrictions which may not be relevant to current job but may affect future efforts to find work on the open labor market (e.g. include lifting restriction even if current job requires no lifting; include limits on repetitive hand movements even if current job requires none).
