New York City Fire Department requires a certified fire guard conducting a fire watch when a required fire protection system is out of service. The **F-01 Citywide Fire Guard For Impairment** authorizes the holder as an impairment fire guard to maintain fire watch duties at any particular location on a citywide basis. Given this condition, the citywide fire guard for impairment may perform their duties for different buildings and different occupancies. The **F-32(Fire guard for shopping center)**, **F-36 (Fire Guard Generic)** and **F-91 (Fire Guard for Hotel/Office Buildings)** are premises related, so they will be only accepted by the Fire Department for conducting a fire watch in the area within the premises.

Impairment includes any condition in which a fire protection system cannot perform its designed fire safety function. Fire protection systems include sprinkler systems, standpipe/hose systems, fire pumps, fire protection water supplies, fire mains, fire alarm systems, and special extinguishing systems (i.e. clean agent, carbon dioxide, wet/dry chemical, foam/water, etc.). In any occupancy, where a required fire protection system (e.g. sprinkler system, fire alarm system and standpipe system) is out of service, a fire watch shall be maintained.
