**Address Where Taxable:** In some instances, BPP (see *Business Personal Property*) that is only temporarily at its current address may be taxable at another location (taxable situs). If you know that this is the case, please list the address where taxable.

**Agent:** Also referred to as a "Fiduciary", a person or institution who manages BPP for another and who must exercise a standard of care in such management activity by law or contract.

**Bailment:** A legal relationship created when a person gives BPP to someone else for safekeeping. To create a bailment the other party must knowingly have exclusive control over the BPP and use reasonable care to protect it.

**Business Personal Property (BPP):** Every kind of tangible, income-producing property that is not real property; generally, property that is movable without damage to itself or the associated real property.

**Business Personal Property Rendition:** A report or statement filed with the appraisal district by the taxpayer that includes the BPP owner's name and address, a general description of the BPP by type or category, and the physical location or taxable situs of the BPP as of January 1. If the aggregate value of the property were greater than \$20,000 it would also include a description and quantity of each type of inventory, and either a "Good Faith Estimate of Market Value" or a historical cost new and year of acquisition of individual items.

**Consigned Goods:** BPP owned by another person that you are selling by arrangement with that person. If you have consigned goods, attach a list identifying the BPP owner's name, address, and a description of the BPP.

Depreciated Value: The BPP value remaining after depreciation has been subtracted from historical cost.

**Good Faith Estimate of Market Value:** Your best estimate of what the BPP would have sold for in U.S. dollars on January 1 of the current tax year if it had been on the market for a reasonable length of time and neither you nor the purchaser was forced to buy or sell. For inventory, it is the price for which the BPP would have sold as a unit to a purchaser who would continue the business.

**Historical Cost:** What you paid for the BPP when it was new, or if you bought the BPP used, what the original buyer paid when it was new. If you bought the BPP used, and do not know what the original buyer paid, state what you paid with a note that you purchased it used.

Inventory (Merchandise and Supplies): BPP that is held by a commercial enterprise for consumption or for sale.

Lease: A contract by which one conveys BPP for a specified term and for a specified rent.

**Property Address:** The physical address of the BPP on January 1 of the current tax year. Normally, the BPP is taxable by the taxing unit where the property is located.

**Quantity of Each Type of Inventory:** The number of inventory items, or other relevant measure of quantity (e.g., gallons, bushels, tons, pounds, board feet). This is a reporting requirement for a business with an aggregate value greater than \$20,000.

**Type/Category:** Functionally similar groups of BPP. Examples are: furniture, machinery, signs, leasehold, office equipment, electronics, computer and data equipment, passenger vehicles and trailers, and inventory (merchandise and supplies). Other types/categories of BPP should also be sufficiently described.

**Year (Acquired):** The year that you purchased or acquired the BPP.

% (Percent) Good: The percent of BPP value remaining after depreciation has been subtracted from historical cost.
