N.I.T.C. Welding Re-Certification by Performance

We wish to use provision 3.1.9. (Performance Qualification). Of AWS "B2.1-84" Standard for Welding Procedure and Performance Qualification.

In order to be Re-Certified, the welders performance qualification shall remain in effect indefinitely unless the welder is not engaged in the process qualified for a period exceeding 12 months or there is some specific reason to question a welder's ability. In these instances, re-qualification may be accomplished by making and testing one test weldment using the same process.
