**How to calculate "Cost of GTR"

When a member is authorized to travel on TDY using a Privately Owned Conveyance (POC) not to exceed (NTE) the cost of government procured transportation/GTR, the orders must state: *"POC travel NTE the constructed cost of the GTR $XXX.XX;"* with the actual dollar amount replacing the "X's". To calculate this amount, you must add together:

1. the government airfare rate *(You can lookup the contract carrier "city pair rates" at http://apps.fss.gsa.gov/citypairs/search/)*
2. any taxi fares and tips that would be appropriate to and from the airport and/or lodging accommodations, mileage and tolls that would be appropriate to and from the airport,
3. airfare service fees,
4. 75% of the M&IE per diem for two travel days,
5. and the cost for a rental vehicle if one would had been authorized.

To determine which will be paid, add together total mileage multiplied by the current TDY mileage rate, tolls, total per diem for travel days (75% for first and last day and full per diem for each additional day of driving travel), and lodging costs (not to exceed max. lodging rate for that area) during travel if required to stop in route. The member will be entitled to the lesser of these amounts. Travel days and reimbursement WILL NOT exceed GTR limits. If there are extenuating circumstances, i.e. member is transporting unit equipment or flying to multiple destinations where the costs to the government would be much higher, then POV may be determined to be advantageous, in which case the orders need to specify and provide reason for decision. For more information, please refer to the following JFTR paragraphs: U3305-A1; U3305; U3325; U3310; U4330; U4326-B3; U4326-A2; U4145-B; and U4147-3.
