Emergency System for Advance Registration of Volunteer Health Professionals (ESAR-VHP)

The Emergency System for Advance Registration of Volunteer Health Professionals **(ESAR-VHP)** is a federal program created to support states and territories in establishing standardized volunteer registration program for disasters and public health emergencies.

The program, administered on the local level, verifies health professionals' identification and credentials so that they can respond more quickly when disaster strikes. By registering through **ESAR-VHP**, volunteers; identities, licenses, credentials, accreditations, and hospitals privileges are all verified in advance, saving valuable time in emergency situations.

Why does Guam need ESAR-VHP?

In the wake of disasters and public health emergencies, many of our nation's health professionals are eager and willing to volunteer their services. And in these times of crisis, hospitals, clinics, and temporary shelters are dependent upon the services of health professional volunteers. However, on such short notice, taking advantage of volunteers' time and capabilities presents a major challenge to hospital, public health, and emergency response officials.

For example, immediately after the attacks on September 11, 2001, tens of thousands of people traveled to ground zero in New York City to volunteer and provide medical assistance. In most cases, authorities were unable to distinguish those who were qualified from those who were not, no matter how well intentioned.

There are significant problems associated with registering and verifying the credentials of health professionals volunteers immediately following major disasters or emergencies. Specifically, hospitals and other facilities may be unable to verify basic licensing or credentialing information, including training, skills, competencies, and employment. Further, the loss of telecommunications may prevent contact with sources that provide credential or privileges information.

The goal of the ESAR-VHP program is to eliminate a number of the problems that arise when mobilizing health professional volunteers in an emergency response.

Please indicate if you are interested in the program and would like more information about registering as a volunteer by making the box with a \vee :

• YES, I am interested to receive more information about ESAR-VHP.

○ NO, I am not interested.
