The FTA will not process transfers unless this form is submitted with other required transfer documents. This disclosure information provides investors with a constant annual prepayment rate (CPR) determined by the seller to be representative of this security. The purpose of the CPR is twofold: (1) to produce a cash flow yield calculation based upon the past performance of SBA loans and, (2) to help investors choose between SBA loans, pools and alternative investments. Past results are no guarantee of future performance. Individual investors should consider the use of several different CPRs to determine the potential yield on an SBA security.
