

MCLB ALBANY SAFETYGRAM

TRAVEL RISK PLANNING SYSTEM (TRiPS)

TRiPS (*Travel Risk Planning System*) is a free web-based program located at <http://www.safetycenter.navy.mil/>. TRiPS makes your trip safer by assessing your travel plans. It can reveal hidden risks and offer recommendations to reduce those risks. TRiPS also strengthens accountability by allowing your supervisor or first-line leader to review your travel plans.

**USE
TRiPS
TO
REDUCE
RISKS**

294 That's how many Marines have died in traffic accidents since 2001. Take one second for each and you will have less than five-minutes. That's all we ask you to invest in TRiPS.

This tool will help you (Marine or Civilian Marine) to reduce the risks you face every time you get behind the wheel or on your motorcycle.

Risk Management is not new - we do it before battle, exercises, and operations. TRiPS puts the benefits of the Risk Management process between you and your decisions. Use it and share it with other employees, fellow Marines, and your supervisor. Be Safe.
