

ABOUT THE SYMPOSIUM

The VCU annual Stroke Symposium features noted faculty and experts in the field. As an academic tertiary referral center, VCU cares for complex stroke patients including, but not limited to, hemorrhagic stroke. Our speakers include our Stroke Medical Director, Board certified vascular neurologists, neuro intensivist, neurosurgery endovascular interventionalist, and neuroscience ICU nursing faculty.

VCU Medical Center is recognized by the Joint Commission as a certified Advanced Primary Stroke Center, American Heart Association/American Stroke Association Gold Performance Awardee, and on the Target Stroke Honor Roll (IV-TPA Golden Hour). The Neuroscience ICU is a Beacon award winner by the American Association of Critical Nurses in recognition of its excellence in critical care nursing. In 2011 VCU Health System celebrated it's redesignation as a Magnet hospital by the American Nurses Credentialing Center.

This timely one-day conference is designed for health-care professionals interested in comprehensive stroke care. This year's focus is recent advances in the care of hemorrhagic stroke (ICH and SAH) patients.

Learning Objectives for the Symposium

- Review etiology, pathogenesis and different types of acute stroke with brief overview of current clinical stroke research
- Identify current standards of care for management of blood pressure for the acute ischemic and hemorrhagic stroke patient
- Describe the implications of anticoagulant therapy
- Discuss medical management, surgical intervention, and nursing care of the hemorrhagic stroke patient
- Introduce evidence based practice to management of diabetes
- Describe evidence-based practice for screening dysphagia and incorporating best practice into patient care.

MANAGING COMPLEX STROKE PATIENTS
