Welp
Hatchery

OUR STORY

Since 1929, Welp Hatchery has been offering high quality chicks at fair prices to our customers. On March 30, 2016, International Poultry Breeders, Inc. - an Iowa corporation - acquired the assets of Welp Hatchery which are being used for ongoing operations in Bancroft. Our goal is to be your "one stop service" for all your poultry needs.

Our specialty is Cornish Rock Broilers. We also offer a very wide variety of egg layer types, rare and unusual breeds, bantams, ducklings, goslings, turkeys, guineas, pheasants and chukar partridges. To help you care for your poultry, we have books, equipment, vitamins and more available.

Orders can be easily placed toll free at 800-458-4473 during business hours or customers can shop on our website 24 hours a day at welphatchery.com.

For general inquiries, we can be emailed at info@welphatchery.com. Any order related inquiry can be sent to orders@welphatchery.com.

Please remember when comparing prices that our poultry prices DO INCLUDE the shipping charges. There are no additional charges on postage!

OUR CUSTOMERS

At Welp, we have the best customers. Thank you for these kind words and sending us these beautiful photos. We appreciate them and we appreciate you!

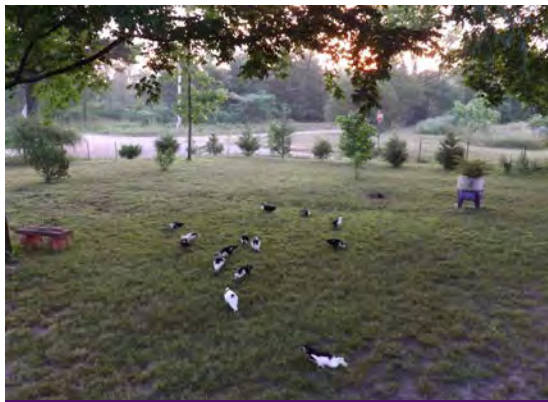

"This beautiful Ameraucana girl is from your hatchery. She hatched at your place in March...she laid her first egg yesterday...it's a beautiful green shade! I'm so happy!" -Kim M.

"Satisfied customer...thank you for helping me and answering every question I had." -Brittany D.

"Just sending you a couple pictures I took today of my pullet and cockerel Light Brahmas that I purchased from you in July. They are going on 6 months old and are such a calm and pretty breed. I have been very happy with my orders from your hatchery. Keep it up!" -Jessa K.

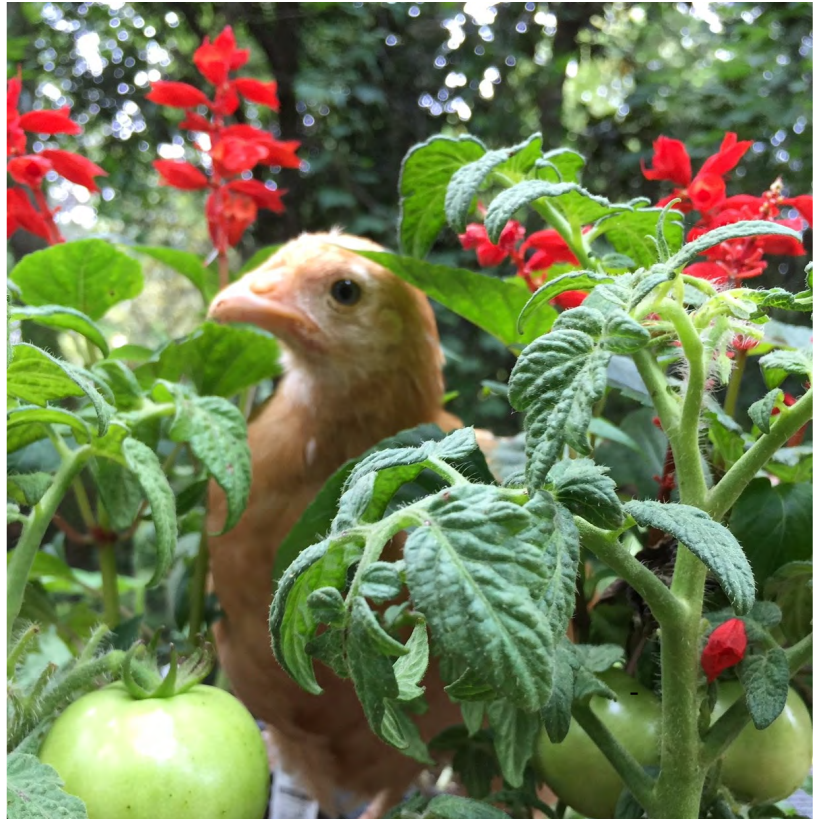

"Just wanted to send you a couple of pics of the beautiful babies I purchased from you. I love my little mags. Four have names, the rest will come later. They have an acre and a half to play in and we are installing a pond. My babies are getting very big and beautiful!" -Deborah L.

OUR CUSTOMERS

Courtesy of Dana H.

"Everyone is doing well and the sweet baby Cornish Rocks couldn't get any cuter either... Thank you for sending such beautiful healthy babies to me, your hatchery certainly has strong stock. We only lost a few, as is expected but in general they are tough and perky birds."

"The watermelon is a hit! 93 degrees outside - I'm having some, my kids are having some and the chicken babies are having some lol...keeps us all hydrated and cool!"

"I'm so excited! This has been such a happy day because when I started it with coffee and the sunrise I said to myself today is the day for the baby yard birds! Haha My daughter is really happy I have been showing her the YouTube videos of baby chicks and telling her we have some chickens coming to live here. She said "I want chickens in my house." Which is the true seal of approval. She's autistic and bless her heart I won't be able to let her hold them without me there because she might squeeze them accidentally.. but this is gonna be so good for her. Healthy food and fun for the whole family. I love your company you especially were so sweet to me. I guess it seems silly to have tears in my eyes for a shipment of 77 baby birds but I can't help it! I'm like smiling and teared up at same time. When we hung up I told my son we have chickens coming and he just smiled. I can read him like a book. He's thinking fried egg sandwiches with bacon lol I know that look!! Hugs to all of you and I look forward to being the best "yard bird" mama I can be!"

"8 weeks old, fat and happy."

MEAT-TYPE BROILERS

You won't MEAT one you don't like

CORNISH ROCK BROILER

Welp Hatchery specializes in Cornish Rock Broilers. These are fast growing, meat-type chickens grown and raised by thousands of Americans across the country. We often use the term "explode" when referring to their rapid growth, as they are in the 5-6 pound dressed weight range at 49-56 days. Due to their fast growth rate, they should be managed a little bit differently than other breeds and will be ready to butcher around 6-8 weeks of age. About 90% of our Cornish Rocks are sold as straight run chicks which means you should have early fryers at 5-6 weeks of age. For roaster weights (8-10 pounds dressed), take pullets to 12-15 weeks of age and dress them out.

| QUANTITY | STRAIGHT RUN | FEMALE | MALE |
|----------|--------------|--------|--------|
| 5-49 | \$1.95 | \$1.83 | \$2.20 |
| 50-74 | \$1.76 | \$1.65 | \$2.01 |
| 75-99 | \$1.71 | \$1.60 | \$1.96 |
| 100-199 | \$1.58 | \$1.47 | \$1.83 |
| 200+ | \$1.56 | \$1.45 | \$1.81 |

- ✓ **Fast Growing**
- ✓ **Broad reasted**
- ✓ **Very Efficient**

*Please note that the butchered weight will be approximately 70% of the live weight.

MUCK BOOTS
COMING SOON!

PREPARATION & TIPS

GENERAL MANAGEMENT RECOMMENDATIONS

How you start and grow your baby chicks and other poultry is very important. From Welp you will receive the finest chicks and poultry that modern breeding can produce. If you feed and manage them along the lines outlined here, they should perform extremely well. If you "cut corners" at any point, the chances are good that it will cost you in the long run. We are providing this information so that you can maximize the performance of your Welp poultry. We hope this is helpful. If you have questions, please feel free to contact us.

BEFORE YOUR CHICKS ARRIVE

The brooding area must be thoroughly cleaned, disinfected and free of poultry for 7-10 days if possible.

1. BEDDING/LITTER Peat Moss and/or Wood Chips are best. Be sure 2-3 inches of bedding covers the area where chicks will be.

2. HEAT Start the chicks at 95 degrees. Drop the temperature 5 degrees per week until down to 70 degrees and/or until no heat is needed. If using heat bulbs, figure two - 125 watt bulbs for 50-100 chicks. Keep a thermometer at chick level so you can manage the temp. Also, be sure you have room in the area you keep them so that they can all be under the heat lamp or out from the heat if they need to.

3. WATER Provide the chicks with only water for the first hour after their arrival. To each gallon of water, add one-fourth cup sugar. Let them drink this water for one hour before providing them with feed. Start with two - 1-gallon waterers per 100 chicks. Figure one linear inch of watering space per chick.

4. FEED See feed and other requirements listed for each poultry type on this page. *Pay special attention to feed recommendations for Cornish Rock roilers.*

5. DRAFT SHIELD Before chicks arrive place a shield of corrugated paper, baled straw or hay around the area where the chicks will be started. This is particularly important during cold starting periods.

6. FLOOR SPACE/LIGHT Figure one-half square foot per bird for the first two weeks. Then increase to one square foot after that. Heat lamps will provide heat/light during the early growing period. After that a 25-40 watt bulb should be sufficient.

7. PREDATORS Guard against domestic or wild animals getting into your poultry operation. If your building isn't sufficiently "tight" your poultry may become a series of "nice meals" for animals.

PREPARATION & TIPS

CORNISH ROCK BROILERS

Start Cornish Rock Broilers just like other baby chicks on a 20-22% Chick and/or Broiler Starter. Keep them on that ration for the first 4.5-5 weeks. At that age, switch them to an 18% Chick Grower. Provide 3 inches of feeder space and 1 inch per chick of watering space. You will “full feed” your broiler chicks around the clock for the first 5 days of age. At 7:00 P.M. of the 5th day, make sure your broiler chicks are completely out of feed. That means there is no feed in the feeders from 7:00 P.M. of the 5th day of age until 7:00 A.M. the following morning. You want them out of feed for 12 consecutive hours. Water, yes, but no feed.. NOT EVEN A THIMBLE FULL! Continue this ‘minor feed restriction’ program removing the feed every night until time of slaughter. Failure to follow this feeding program may result in heart attacks. Sudden Death Syndrome or “FLIP” is the result of very rapid growth. Following the above restriction outline, will reduce FLIP substantially. Regardless of location in the U.S., you must follow this feed restriction program. For people living in higher elevations (mountains), it is VERY IMPORTANT that feed restriction be practiced.

FREEDOM RANGERS

Recommend to start Freedom Rangers on a 24% Broiler Starter for the first 5 weeks and then switch to a 20% Grower to finish them on.

TURKEYS

Turkeys are not the easiest birds to get started. Start and grow turkeys on 28% Turkey Starter for the first 8 weeks; 20-21% from 9-14 weeks; and then go to a 16% Turkey Finisher. If turkey feeds are not available, it is fine tarring them on 20% Chick Starter for the first 10-12 weeks and then finish them on an 18% Grower with limited feeding of cracked corn/whole oats on the side. Try to use medicated feed. Figure 2 inches of feeder and 2 inches of watering space per bird for the first 3-4 weeks. Expand that space if needed.

SPECIAL NOTE: Start turkeys at 100 degrees and decrease 5 degrees each week. Turkeys are very susceptible to cold, so be sure the brooder and bedding are warm when they arrive. Sometimes turkeys will not find food and water at time of arrival. If you have baby chicks that are 5-10 days old, you might consider putting 4-5 of them in with the newly arrived turkeys for 2-3 days. Be sure to take the chicks out when the turkeys have caught on, as there is potential for contracting Blackhead disease from droppings.

GAME BIRDS

Guineas can be started much the same as the feeding program for Turkeys. Actually, Chick Starter feeds are widely used for small lots of Guineas with good results. Using a 28% Game Bird feed for Pheasants is best. Most feed stores handle that type of feed.

WATERFOWL

Waterfowl can be started on an 18-20% Duck and Goose (or Chick) Starter. At 3-4 weeks of age, switch them to a 16% Grower ration. At this age you can also start providing some corn/oats on the side. Feeding and watering space is very important. Figure 2 inches of feeder space per bird for the first 2 weeks; 3 inches through 6 weeks; and 4 inches from then on. On watering space, figure 2-3 inches per bird all the way through. Add more space during hot summer days. Some of the newer medicated feeds have been found to harm waterfowl. If at all possible, we would suggest not using medicated feed if there is another alternative.

ORDERING INFO.

Top of the pecking order

IMPORTANT ORDERING INFO.

MINIMUM ORDER AMOUNTS

| | |
|--|-----------|
| Chicks (Meat-Type, Layer-Type) | 25 |
| Crested Polish | 25 |
| Bantams | 30 |
| Turkeys | 15 |
| Ducklings | 15 |
| Goslings | 10 |
| Pheasants | 30 |
| Chukar Partridges | 50 |
| Guineas | 30 |

Different types of fowl cannot usually be combined to meet minimums, but you can usually combine different breeds within each type of fowl to meet the requirements. For example, you can order 5 Barred Rocks and 20 Red Sex Links to meet the minimum of 25 standard sized chickens. However, you cannot order 10 Barred Rocks and 15 Pheasants to meet the minimum because they are two different types of fowl.

All pullets and straight run must be ordered in a quantity of 5 or more. Males may be ordered less than 5, however, there is a \$1.50 fee per breed for ordering less than 5. Must still meet the minimum order quantity above in the shipment.

For full live arrival guarantee of chicks/poultry purchased, Welp must be notified within 48 hours of the arrival of the chicks at your post office.

SPECIAL SERVICES

Marek's Immunization (Chicks Only)

- Vaccinated day-old

Mark Head

- Used to identify females and males

Coccidiosis Spray (Cornish Rock Broilers Only)

- Applied day one and used by organic and large-scale farmers. If used, you cannot use a coccidiostat in the feed, as it will counteract the spray. Must ensure dry litter conditions in winter/spring months. Chicks will come with a dye on them and this will go away as the chicks mature.

WILD FOWL

For customers ordering Wild Fowl, we suggest you check with the Regulatory Agency in your state that controls Wild Life Management. It is possible you may need a permit to raise wild fowl, or that only certain strains are allowed.

WELP SEXING, QUALITY GUARANTEE AND WARRANTY LIMITATION

WE GUARANTEE PULLETS TO BE 90% ACCURATE TRUE TO SEX. IF MORE THAN 10% COCKERELS, WE WILL REFUND THE PRICE OF THE CHICK. CLAIMS MUST BE MADE WITHIN 8 WEEKS OF HATCH. IN THE PRODUCTION OF WELP'S CHICKS, WE HAVE FOLLOWED APPROVED AND RECOMMENDED METHODS OF FLOCK CONTROL AND EGG SELECTION AND HAVE OPERATED OUR HATCHERY ACCORDING TO ESTABLISHED SANITARY AND DISEASE CONTROL STANDARDS. HOWEVER, WE DO NOT WARRANT THESE CHICKS TO BE FREE FROM ANY DISEASE THE EXISTENCE OF WHICH CANNOT BE REASONABLY ASCERTAINED AT THE TIME OF SALE. THE SELLER'S LIABILITY FOR ANY REASON WHATSOEVER SHALL BE LIMITED TO THE AMOUNT PAID FOR THE GOODS OR SERVICES CLAIMED TO BE DEFECTIVE AND THAT IN NO EVENT SHALL SELLER BE HELD LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES. BY ACCEPTANCE OF THE CHICKS OR PULLETS THE BUYER ACKNOWLEDGES THAT THE LIMITATIONS AND DISCLAIMERS HEREBY SET FORTH ARE CONDITIONS OF THE SALE AND CONSTITUTE THE ENTIRE AGREEMENT BETWEEN THE PARTIES REGARDING WARRANTY OR OTHER LIMITATIONS AND THE REMEDY THEREFORE. THIS SALE AGREEMENT, AND THE TRANSACTION SHALL BE GOVERNED BY THE LAWS OF THE STATE OF IOWA. WE BREED AS CLOSE TO THE AMERICAN STANDARD OF PERFECTION AS POSSIBLE, BUT DO NOT GUARANTEE SHOW QUALITY.

FREQUENTLY ASKED QUESTIONS

WHAT ARE THE BEST EGG LAYERS?

Our best brown egg layers would include the Red Sex Link, Rhode Island Red or Barred Rock. If you prefer a white egg, then we suggest the California White or the White Leghorn.

WHAT ARE THE BEST DUAL PURPOSE CHICKENS FOR EGG PRODUCTION/MEAT?

The White Rock, Barred Rock, Rhode Island Red and New Hampshire Red all have good meat qualities, as well as efficiency in laying eggs.

WHAT IS THE PROPER MALE/FEMALE RATIO TO ENSURE FERTILE EGGS?

One rooster to approximately 8-12 hens. Like breeds should be kept isolated for 4-7 days to ensure fertility.

WHAT IS THE DIFFERENCE BETWEEN STRAIGHT RUN/PULLETS/COCKERELS?

Straight Run chicks are chicks that have not been sexed. They are shipped as hatched and should be around an equal amount of males/females, although there is no guarantee. Pullets are female chicks. Cockerels are male chicks.

WHAT ARE MY PAYMENT OPTIONS?

The quickest way is to use our secure online shopping cart. You can also call your order in or complete the Order Form using your credit card information. If you do this, we can book your order immediately. We accept Mastercard, Visa and Discover. Another option is to send us a money order prior to shipment. We would need to receive the money order before we can book the chicks. We do not ship C.O.D.

DO I HAVE TO PAY SHIPPING AND HANDLING COSTS?

There are no additional postage or handling costs! The price you see per chick is the only cost you will have. There are no shipping tables, weight charts, etc. to worry about!

HOW LONG WILL IT TAKE TO GET MY CHICKS?

Your chicks are shipped via the United States Postal Service using Priority Mail. They should arrive at your local post office about 2-3 days later. For example, if the hatch/ship date is Monday, your chicks should get to you on Wednesday or Thursday of that week. There are some occasions when your chicks could even arrive the next day, so it's best to be prepared for 1-3 days after the ship date. Please be aware that once they are entered into the postal service, we cannot control the time/day that they arrive.

HOW ARE THE CHICKS SHIPPED?

They are boxed in specially made cardboard boxes with holes in the sides for proper ventilation. We have minimum order quantities so that there are enough chicks to produce enough body heat to make the trip safely. We box them according to the weather. In the warmer months, we cut back on the number of chicks per box to ensure they do not get too warm.

WHAT DOES WELP GUARANTEE?

We will provide you with healthy, quality chicks. Live delivery is guaranteed. We often put extra chicks in the boxes, so be sure to count your live chicks. We will not replace extra chicks. For arrival guarantee, please phone us immediately if you have any problems when the chicks arrive. We must be notified within 48 hours after arrival or we cannot issue credit or send replacement - no exceptions.
